RCLMHEX
PET Wall Panels
## Installation Instructions

**Tools Required:** None

IMPORTANT: For best results:
- Allow recommended time for adhesive strips to attach to PET panels before affixing them to a wall (spring, summer, autumn = 12-24 hours, winter = 48-72 hours).
- Ensure wall is clean, dry, flat, and dust-free before attaching panels.
- Indoor use only at temperatures between 50°F and 100°F (10°C and 38°C).
- Do not use outdoors or in damp or high humidity locations.
- Do not use on wallpaper, damaged walls, or damaged glass.

Parts Key

6-Pack
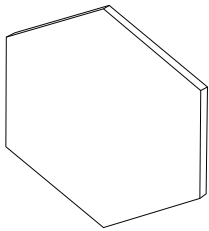

|			
Hexagon PET Panel **Thick x 3**	Hexagon PET Panel **Thin x 3**	Adhesive Strip **Fabric Side x 12**	Adhesive Strip **Hook Side x 12**

### 12-Pack

|			
Hexagon PET Panel **Thick x 6**	Hexagon PET Panel **Thin x 6**	Adhesive Strip **Fabric Side x 24**	Adhesive Strip **Hook Side x 24**
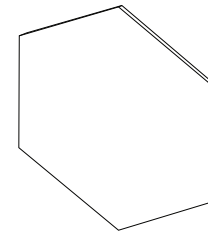

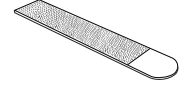

1 Remove protective film from two fabric side adhesive strips.
**IMPORTANT:** Do not touch the adhesive.

2 Stick both fabric strips to one side of a PET panel as shown.

Fabric Side

Fabric Side

NOTE: Both sides of each panel are identical, so it does not matter which side the adhesive strips are attached to.

3 Press firmly and hold 30 seconds.*

30 Seconds

* For best results, wait 12-24 hours (during spring, summer, autumn) or 48-72 hours (during winter) before proceeding to step 4.

Pattern Ideas

Removing Adhesive Strips from a Wall

1. Firmly hold the strip with one hand.
2. Grab the tab with your other hand.
3. SLOWLY pull the tab parallel with the wall, away from the strip.
4. Keep the tab as close to the wall as possible (NEVER pull away from the wall).
5. The adhesive layer will slide out from behind the strip, detaching the strip from the wall.

NOTE: Adhesive strips are not reusable.
